

QUESTIONNAIRE AND AERIAL MAP INSTRUCTIONS

Lakeside Association LPS Project
Project No. 92RE05624

Return the completed questionnaire and marked-up aerial map with the Enrollment Agreement. This information will be used during a meeting between the property owner(s) and the contractor, which will be scheduled before the grinder pump installation occurs. If you have any questions or the property shown is not yours or if any information is incorrect, please contact the project manager at the email or phone provided on the accompanying letter.

Questionnaire Instructions:

- Please answer all applicable questions to the best of your ability.
- For any answers that are unknown, please note that.

Aerial Map Instructions: (Note: See the sample aerial map below as a reference for the following instructions.)

- The approximate location of your property line is shown as a heavy red line.
- Using a pen or marker, show the approximate locations of the following (if known):
 - **Water Well [Label as WW]** – Show the location of your water well if your drinking water comes from your own well and you do not have municipal water.
 - **Septic Tank [Label as ST]** – This tank should be completely buried, but there may be a small metal or plastic cover at the surface for access.
 - **Lateral from House to Septic Tank [Label as LAT]** – This would likely be a pipe that leaves the lower level or crawl space of your house and goes underground toward the septic tank.
 - **Finger System (Septic Tank Absorption Field) [Label as FS]** – A finger system or absorption field usually covers a big area. It is made up of buried pipes. We only need the approximate area of the finger system, not every pipe in the system.
- We are not asking you to 'dig up' anything on your property to locate the above features. Please only mark what you know.

QUESTIONNAIRE

Lakeside LPS Project
Project No. 92RE05624

PROPERTY STREET ADDRESS: _____
(Please provide property address)

1.	Are you connected to municipal sewer?	Yes ____	No ____
2.	Are you connected to municipal water?	Yes ____	No ____
