Re: Application for Industrial Pretreatment Program Delegation

Dear Ms. McIver:

The U.S. Environmental Protection Agency (EPA) has reviewed the CWA Authority, Inc.'s (the Authority) November 30, 2012 industrial pretreatment program application (which consisted of a legal authority statement, proof of financial and staffing resources, a local limit technical evaluation, interjurisdictional agreements, industrial user survey forms, an enforcement response plan and a sewer use ordinance). In a letter dated January 12, 2016 EPA informed you that industrial pretreatment program application was approvable. That letter went on to say that this approval was conditional and before we could approve the application, the document package would need to be passed by the Authority's governing body and contain the appropriate signatures. On February 1, 2016 EPA received the approved pretreatment program package. In accordance with Section 403.18 of the General Pretreatment Regulations, I am pleased to inform you that based on our evaluation of the information provided, the industrial pretreatment program application are approved. The implementation of this industrial pretreatment program application is consistent with the federal requirements and your responsibilities with regard to pretreatment. Within 90 days, the Authority should revise its Industrial User permits where necessary to reflect the new program.

Thank you for your continued commitment to protect our nation's water resources. If you have any questions, please contact Jodie Opie at (312) 353-1938 or at [Opie.Jodie@epa.gov](mailto:Opie.Jodie@epa.gov).

Sincerely,

A handwritten signature in blue ink, reading "Tinka G. Hyde", is positioned above the printed name.

Tinka G. Hyde  
Director, Water Division
